

Entry help for submitting projects on the KTUR innovationX platform

Unfortunately, it is not possible for users to save an uncompleted project as draft for later review on the innovation-transfer.eu platform. Therefore, we would like to provide an overview of the information you require in order to submit your project.

It is recommended to write the information in a text document and then copy it into the submission form. This should help you to prepare such that no further information must be collected during your actual project submission and be doable in an efficient manner.

Do you have any questions about the KTUR platform InnovationX?

Then please fill out the "Contact" form on the website. We will get in touch with you as soon as possible. If any questions pertaining your individual project submission come up during the process, the last field in the submission form will allow you to attach them for the moderators to read.

The manual for the platform as well as this document you can download on the platform:
